Chennai, TN | +91 8870762077 | vijayathiraj99@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

- Full Stack Developer with 3+ years of experience building scalable web and AI-driven applications.
- Specialized in React, Next.js, and NestJS with extensive production deployments on AWS and Docker.
- Proven track record of reducing development cycles by 40% through reusable architecture and system design.
- Actively transitioning into AI Engineering with a focus on LLMs, video analysis, and automation.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, SQL
- **Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS (v4), Framer Motion, Material UI
- **Backend:** Node.js, NestJS, Express.js, REST APIs, Web Sockets
- **Databases:** PostgreSQL, MongoDB, Redis, Sequelize ORM
- **Cloud/DevOps:** AWS (EC2, S3, RDS), Docker, CI/CD, Shell Scripting, Apache
- **Tools:** Git, Postman, Razorpay, SendGrid, Hugging Face, Linux (Ubuntu)

PROFESSIONAL EXPERIENCE

Infoapto Technologies

Full Stack Developer

Chennai, TN

Sep 2023 – Present

- Architected scalable applications using Next.js and NestJS, leveraging Docker for consistent AWS deployments.
- Reduced development time by 40% via modular components and optimized backend services.
- Managed AWS infrastructure (EC2, S3, SSL) and automated deployment workflows.
- Led the internal migration to React 19 and Tailwind CSS v4 for high-performance UI systems.

RAMSOL PVT LTD

Consultant Front-end Developer

Chennai, TN

Feb 2023 – Aug 2023

- Improved application stability by 50% through comprehensive frontend refactoring and state management optimization.
- Migrated legacy systems from MERN to PERN stack, significantly improving data integrity and query performance.
- Built complex, interactive data visualization dashboards using ApexCharts and Material UI.

Azure Soft Tech Solutions

Software Associate

Madurai, TN

Jul 2022 – Jan 2023

- Developed core features and contributed to scalable application modules for client-facing projects.
- Collaborated with cross-functional teams to deliver clean, maintainable, and well-documented codebases.

KEY PROJECTS

Recrobot: AI Video Assessment Platform

Architected an AI-driven recruitment platform using **NestJS, Next.js** to automate candidate evaluation. Implemented role-based access control (RBAC), job posting workflows, and integrated **AWS S3** with transcription APIs to capture video interviews and generate structured AI insights and reporting for recruiters.

SendHopeCards.com: Digital Greeting Platform

Architected a robust backend infrastructure and deployment procedures using **NestJS, PostgreSQL, and Sequelize ORM**. Implemented secure payment processing via **Razorpay** and automated email delivery systems through **SendGrid**. The entire environment was **Dockerized** to ensure environment consistency and scalable cloud deployment.

Replyd.com: Community Transparency Platform

Built a community platform focused on interview transparency, developing a feedback engine that connects candidates with company insights. Automated the deployment process using **Custom Shell Commands**, ensuring a fast and reliable **CI/CD pipeline** for the **NestJS and Next.js** environment.

Task Management System with AI Insights

Architected a team productivity tool using **Next.js and Tailwind CSS v4** with a hierarchy-based task assignment system. Built a "Performance Linked Pay" calculator to analyze employee output and integrated **AI-driven performance insights** for both administrative oversight and employee tracking.

WitsAcumen: BI Platform for Leadership Hiring

Contributed to a Business Intelligence platform using **Next.js, Framer Motion, and Tailwind CSS**. Engineered a secure, wallet-based authentication UI and sophisticated filtering systems for curated talent pools, ensuring high data security and fine-grained **RBAC visibility** on the frontend.

DBGenie: Cross-Platform Data Hub

Engineered an **Electron + React** application utilizing Boolean search for instantaneous resume retrieval from local data. Integrated **LangChain and Hugging Face** models to automate talent data processing and information extraction, streamlining high-volume recruitment workflows.

HRMS: Human Resource Management System

Built a full-featured HR platform using **React.js and Material UI**, covering the entire employee lifecycle. Integrated modules for attendance, payroll, and leave tracking, alongside an end-to-end **Applicant Tracking System (ATS)** with complex role-based login permissions.

EDUCATION

M.Sc Mathematics

Ayya Nadar Janaki Ammal College of Arts and Science

Focused on: Linear Algebra, Multivariable Calculus, Mathematical Statistics, and Algorithmic Optimization

Jun 2020 – Jul 2022
Coursework Completed

B.Sc Mathematics

Arulmigu Kalasalingam College of Arts and Science

Jun 2017 – May 2020
CGPA: 7.29
